PROJECTS

EducadorAI AI-Powered Study Assistant

- Built a full-stack web app that converts PDFs into structured study materials (summaries, highlights, key terms, and Q&A) using Gemini LLMs and a custom extraction pipeline.
- Implemented secure file upload with UploadThing and stored results in Neon Serverless Postgres for fast retrieval and repeat access.
- Developed responsive, UX-focused interfaces with Tailwind CSS and conditional authentication flows using Clerk.
- Deployed and configured production builds on Vercel with environment-based configuration and CI-ready setup.
- **Technologies:** Next.js, React, TypeScript, Node.js, Gemini API, Serverless, LLM integration, Prompt engineering, PostgreSQL, Neon, Clerk Auth, Tailwind CSS, Vercel, Git/GitHub

Hospital Management System (Project Based Learning)

- Technologies: React, Django, Python, PostgreSQL
- Designed a comprehensive OPD and IPD management solution with real-time bed and queue status tracking.
- Integrated dynamic triage-based priority queues for patient assignment, reducing average wait time by 60%.
- Developed custom APIs in Django to manage doctors schedules, medicine inventory, and patient records.
- Created intuitive dashboards with role-based access for patients, doctors, and admin staff.
